ILLEGIB 1. [REDACTED] Waagner-Biro A.G. has completed construction of the  
believed to be destined for the USSR

- a. Five overhead shop cranes (Pratzenlauf), each 12 meters long and weighing 8 tons. Instruction plates on this equipment are made out in Cyrillic script.
- b. Two basket-type loading cranes (Korbchargierkran), each 22 meters long and weighing 20 tons. Construction lagged eight days behind schedule on this order because of difficulties in the local procurement of AEG-manufactured 380-volt resistors.
2. Three more cranes of the basket type are scheduled to be built before the end of August 1952, but will probably not be completed on schedule since work has not yet begun on this order.

25X1 1. [REDACTED] Comment: For previous information on Waagner-Biro production
